

TOUCH TOOL ROOM

You can quickly and easily convert your manual tool crib into a virtual dispensing machine, with the AutoCrib® Touch Tool Room. Just designate an existing tool room, tool crib or stores area as a tool crib, using AutoCrib® Software. Install an AutoCrib® Touch Tool Room at the crib window — and now, tool crib attendants or users can perform the data entry using a touch screen. After the user selects the desired items, a receipt with bin locations is printed to assist the attendant or user in locating the items within the secured area.

You can also place TouchTool Rooms at various locations or remote work cells throughout a plant to create a “runner system”. Users enter requests for tools or supplies at the Touch Tool Room. The central tool crib prints out the order, and issues and a “runner” delivers the requested tool (at lower cost), while keeping the operator at his work center.

HOW IT WORKS

1. Login – Employees access the Touch Tool Room by using their employee badge or by entering their employee number.

2. Select Item – Users select the item(s) they want, or scans a barcode on a pick sheet along with the quantity desired.

3. Get Item – At this point, the crib door can be unlocked by the system and a receipt with bin numbers is printed to assist in locating the items.

Returns – The employee badges in, presses the returns button, a list of items to be returned by that employee will appear, and they select the items to be returned. All transactions are recorded in the AutoCrib[®] database in real-time.

Optional: A PIN can also be required as well as prompts to track overhead data like Department Number, Job Number, Customer Number, Tail Number, etc...

FEATURES

- Automate your existing tool room, crib, or stores room
- Issue/Return tools without an attendant
- Use at remote locations in a “runner system”
- Handheld high-output barcode scanner
- Full user access support - Supports proximity cards, key fobs, mag-stripe cards, barcodes, keypad/PINs
- Locate by item or location - Easily search for any item in any tool crib in the AutoCrib system
- Multilingual - Support for other languages
- 12-month warranty

SOFTWARE

- **Over 200 standard reports!**
- **AutoCrib.net or Client-Server** - Cloud managed services or secured internal network
- **Intelligent Dashboard** - See your key metrics at a glance on one screen
- **EDI** - Advanced ship notices (ASN) via EDI
- **ERP System Support** - Interface with many popular ERP systems (SAP, JDE, Baan, etc...)
- **Physical or Cycle Counts** - Perform physical or cycle counts
- **Purchasing and Receiving System** - Automatically reorders supplies with a approval system
- **Control Access** - Management can control access by user levels
- **Alerts** - Get inventory alerts, and send email reports to any smartphone, tablet, or computer
